PREFACE

By its very nature a supplementary is not something new but rather an adjunct or continuation of the parent volume. Supplements were issued from time to time to the Gazetteer volumes published in the old series. The object of issuing such Supplementaries to the District Gazetteers is to up date the statistical data contained in the parent volume.

The revised edition of the Bara Banki District Gazetteer was published in 1964 by the Gazetteers Department. The present volume is intended to supplement the information contained in the revised edition by more recent statistics. Every attempt has been made to bring the statistical data as up-to-date as possible.

My thanks are due to Sri Rudra Shekhar Misra, Editor and Sarv Sri Sundar Lal and Chandra Prabhakar Sharma, Team Leaders among the Compilation Officers of whom Sri Sunder Lal has since retired, for their valuable assistance in this work. I am also thankful to the other staff members of the office for their association in the preparation of this volume.

I will be failing in my duty if I do not express my thanks to Dr P. N. Chopra, M. A., Ph. D., Editor (retd.), Central Gazetteers Unit, Ministry of Education, Government of India, New Delhi, as also the editorial staff of the Unit for their effective role in the planning and co-ordinating the work of preparation of the Supplementaries. The Unit scrutinised the Tables of this Supplementary with great care and made several helpful suggestions.

The information as statistical data contained in the Supplement is based on the Census publications for the years 1961 and 1971 and the various official records maintained at the office of the collector and district magistrate and the district offices of numerous departments of the Central and State governments to whom my sincere thanks are due.

FOREWORD

The draft of the Supplementary volume of the district Gazetteer of Bara Banki was sent to the press for publication by my predecessor, Sri Ram Swaroop in March, 1985. Delays in the publication of the supplement are regretted. We are trying hard and hope to reduce such delays in the writing, printing and publications of our future departmental publications.

2. The Supplement contains Tables and material for fifteen of the nineteen chapters of the original district Gazetteer of Bara Banki already printed and published in 1964. The compilation work on the Supplement was started in June, 1978 on the lines indicated by the Central Gazetteer Unit, Ministry of Education, Government of India and hence the figures of 1981 Census and later could not be included in the present volume.

3. Keenly aware of the shortcomings and gaps in the Supplement, we hope more nearer updated information would be included in the revised Gazetteers of the districts, which are also planned to be written in Hindi language for the greater use of the common people of Uttar Pradesh.

4. Suggestions for further improvement of the future gazetteers are solicited from all concerned.

Infant Mortality

Infant mortality has considerably decreased in the district since the fifties of this century, as the measures of childcare, both before and after birth, have increased manifold.

In the sixties the largest number of children (below one year in age) died in 1967, when the infant mortality figure was 2,366. The minimum figure was 67 in 1969. In the seventies the maximum number of deaths occurred in 1972 when 762 children died.

The following statement gives the figures of infant mortality in the district in the period between 1963 and 1976 :

Mortality from various Diseases

In the sixties and seventies the number of deaths due to fever decreased considerably. The other diseases which caused a large number of deaths were respiratory diseases, dysentery and diarrhoea. As many as 2,140 persons died of these diseases in 1967. The maximum figure for the seventies was 1,414 in 1973.

The following statement gives details of persons who died of different diseases :

MEDICAL FACILITIES

There were 44 allopathic institutions in the district in 1977 comprising 17 primary health centres, 10 hospitals and 17 dispensaries and a total of 364 beds were available in them. In the year 1978 two State dispensaries were opened at Peerpur and one at Udawatpur; Another dispensary was opened at Bara Banki by the Employees State Insurance Corporation for the benefit of the factory workers in 1979. The total number of patients treated in 1979 was 2, 779 indoor and 59,119 outdoor.

The opening of 17 primary health centres in the district has extended medical facilities to the villages. The following is a list of primary health centres in the district :

Administrative Set-up

In 1973 the departments of medical and public health were reorganised, abolishing the posts of the civil surgeon and the district medical officer of health. Under the new set-up, a chief medical officer has been appointed who heads the entire medical, public health and family planning set-up in the district. He is assisted by three deputy chief medical officers who supervise the hospitals, employees' State insurance scheme dispensaries, primary health centres, infectious diseases hospitals and school health dispensaries situated within their respective jurisdiction. They are assisted by doctors, compounders, nurses, etc., posted in different medical institutions.

1. The district has been divided into three regions, for health and medical purpose since, 1977 and each region is administered by one deputy chief medical officer.

In the year 1977-78, the community health scheme was introduced in the rural areas of the district. One community health visitor has been appointed for each 1,000 of the population. The visitor is trained to render first-aid and preliminary treatment. He carries a medical-kit containing medicines, bandages, etc. The visitor also reports about incidence of epidemics, if any, to the primary health centre to which he is attached.

Sanitation and Public Health

The chief medical officer assisted by three deputy chief medical officers, also exercises control and supervision over all primary health centres, and rural dispensaries having less than 30 beds. He is also responsible for the collection of intelligence about epidemics, checking of food and drug adulteration and for providing necessary assistance during the floods and the outbreak of epidemics. For his assistance there are also one assistant medical officer at the district headquarters and one to two medical officers in each primary health centre.

For public health and sanitation every local body has its own team of sanitary inspectors and vaccinators. Besides, each Gaon Sabha is responsible for village sanitation. The services of sanitary inspectors are available to the Gaon sabha, for technical help and guidance. The *pradhans* (village headmen) report outbreaks of epidemics to the primary health centres for initiating preventive and curative measures.

FAMILY PLANNING

There had been much progress in family planning (welfare) work in the sixties and seventies. The chief medical officer is in over all charge of the family planning work in the district and is assisted by three deputy chief medical officers and other medical and para-medical staff. There were 17 family welfare centres with

a net-work of subcentres in the district in 1979-80. Details regarding the family planning work done in the years 1970-71 to 1979-80 has been given in the statement that follows :

MALARIA ERADICATION PROGRAMME

The eradication of malaria was initiated in 1958 with the spraying of D. D. T. D. D. T. spraying was carried out twice in a year till the end of 1962. Since 1961 domiciliary visits are carried out, and the trained staff visits each house to search and treat malaria cases. D. D. T. spraying has again been started since 1978 covering 50 houses around the location of each positive case detected by the staff.

The staff engaged in the eradication of malaria comprises one district malaria officer, two assistant malaria officers, three senior malaria inspectors, one senior laboratory technician, and one malaria inspector. This staff is posted at Bara Banki. A large field staff operates in the rural areas and is posted at the primary health centres. It comprises 129 basic health workers, 32 health inspectors and 16 laboratory technicians.

The following statement gives the incidence of malaria in the district in the years between 1961 and 1979 :

Filaria

The national filaria control programme, which was introduced in 1957, has covered the whole district in the last 20 years. The main aim of the programme is to locate places where filaria mosquitoes breed, and then to eliminate them. Generally filaria mosquitoes breed and grow in dirty stagnant waters. Facilities have also been provided for treating filaria patients. The incidence of filaria in this district is very low, as the following statement indicates :

ERADICATION OF SMALLPOX

The national smallpox eradication programme was launched in the district in 1964-65. The main objective was the successful coverage of the entire population by primary and re-vaccinations. At present the chief medical officer, is in charge of the scheme. He is assisted by a team of sanitary inspectors and vaccinators.

In the seventies, the smallpox took an epidemic form and as many as 95 and 98 persons died of it in 1973 and 1974 respectively. However, only 12 persons died in 1975. The following statement gives the number of persons vaccinated in the seventies and in 1980:

PROHIBITION

The government formulated a scheme of imposing prohibition in the State. Under this scheme many districts of the State were declared 'dry' areas and prohibition was imposed in different districts on different dates. In this district it was imposed on April 1, 1978. By a government notification dated March 30, 1978 the sale of liquor and other intoxicants was completely banned in the district. Later the government, by a notification of September 14, 1978, also prohibited the sale of 19 medicines containing alcohol. The excise commissioner and his subordinate officials looked after the implementation of government notifications in this regard. The maximum penalty for the violation of prohibition was a fine of Rs. 5,000 and 3 years' imprisonment and the minimum was a fine of Rs. 500 and six months imprisonment. Since April 1, 1978 to December, 1979 the total number of prohibition offences in the district was 440.

The government revised its policy regarding prohibition and it was lifted in most of the districts. Though the district ceased to be 'dry' area since September 1, 1980, the efforts of the social workers continue to make the people conscious of the evils attached to indulgence in liquor and other intoxicants.

PUBLIC LIFE AND VOLUNTARY SOCIAL SERVICE ORGANISATIONS

Vidhan Sabha (Legislative Assembly)

The system of double member constituencies was abolished in the 1962 general elections. The newly formed constituencies were those of Rudauli, Haidergarh, Sidhaur, Dariyabad, Satrikh, Nawabganj, Kursi and Bhitauli. Sidhaur, Satrikh and Kursi constituencies were reserved for the Scheduled Castes candidates. The results of this election (1962) were as under :

TABLE I (2)

For the general elections held in 1967, the Constituencies were delimited afresh and the newly formed constituencies were these of Rudauli, Daymyabad, Sidhaur, Haldergarh, Masauli, Nawabganj, Fatehpur and Ramnagar. Constituencies of Sidhaur and Fatehpur were reserved for the Scheduled Castes Candidates.

The following statement shows the number of candidates put up, seats won and votes secured by each contesting party and the Independent candidates for the Vidhan Sabha elections of 1967 :

TABLE I (b)

The Vidhan Sabha, constituted after the general elections, was dissolved on February 25, 1968, due to a large number of defections among the members which forced the government to submit its resignation. The State was placed under the President's rule. A midterm poll was held after about a year in 1969. In all forty-six candidates belonging to eight different political parties (besides Independents) contested for the eight seats. The constituencies remained the same as in 1967. The results were as follows :
